scaricare richiamo tordo bottaccio da scaricare mp3 finest automatic hammer 2 pain collections started by novre and natalie A: It is some issue in the part of your query where you are joining tables. I am not able to reproduce the issue you are facing. You can create indexes on the tables you are joining to create index idx1 on game_history(country_id, rules_id, score, country_code); create index idx2 on game_history_played(country_id, points, team, country_code, team_score); I see that you are not really using the columns you have created an index for. So make use of them in the where clause. select hd_b.country, hd_a.country, hd_b.rules_id, hd_a.rules_id, hd_b.score, hd_a.score, hd_b.team, hd_a.team, hd_b.team_score, hd_a.team_score, hd_b.score_diff, hd_a.score_diff, hd_b.country_code, hd_a.country_code from game_history hd_a, game_history hd_b where hd_a.country_id=hd_b.country_id Also use the appropriate join syntax select hd_a.country, hd_b.country, hd_a.rules_id, hd_b.rules_id, hd_a.score, hd_b.score, hd_a.team, hd_b.team, hd_a.team_score, hd_b.team_score, hd_a.score_diff, hd_b.score_diff, hd_a.country_code, hd_b.country_code from game_history hd_a join game_history hd_b on hd_a.country_id=hd_b.country_id This query will return the same result as the one you posted Q: How to simulate a trigger action on a SQL Server 2005 database I am trying to
