2. **Draw any sketches, doodles, or images into Photoshop.** Open the image you want to use. If you're using the image of a building that you want to draw onto, you can skip steps 3 and 4 and continue on with step 5. From the View menu, choose either the Properties or Quick Mask mode. If you have layer visibility turned on, the Quick Mask mode will be selected by default. Otherwise, when you choose Properties mode, the Quick Mask is automatically turned off. After you've opened your image, draw what you want to draw into Photoshop. Start with a single line of the image. If you want to add color or change the style, make the object you want to draw by clicking once, hold down the Shift key, and then click again. If you don't have the Shifting Tool (the tiny triangle at the top right of the Tool palette), you can use the Move tool (which is the pen tool) to make selections and move objects in and out of the image. When you're happy with the drawing, click the New Layer button at the bottom of the Layers palette (see Figure 2-12). FIGURE 2-12: Click the New Layer button at the bottom of the Layers palette to create a new layer. 3. **Create a new background layer on the second-from-top layer in the Layers palette and name it something like "Text."** See Step 5 at the beginning of this list for help in choosing a background layer. 4. **Put the drawing into the new layer.** Draw some boxes, lines, and other shapes that you want to add to the image (see Figure 2-13). FIGURE 2-13: Draw elements into the layer. Some drawing tools, including the Spot Healing Brush, Brush, Smudge, and Eraser tools, work a little differently when you use the Free Transform command (see the following section) to distort an image. See the Photoshop Help screen for more information about how to use each tool. 5. **Draw any elements that will belong to the text layer.** When you've finished drawing, click the New Layer button again to create a new layer. Name it "Text" and insert the drawing into it (see Figure 2-14). The Free Transform command (Ctrl+T or Image→Transform) can be quite useful in

The Charge of the Light Brigade The Charge of the Light Brigade () is a book by the French author François Mauriac, first published in 1935. It first appeared in English translation in 1953. A substantial revision, with new notes, notes on facsimiles, and a preface by Maurice Genevoix, followed in 2005. It is considered as one of the masterpieces of 20th-century French literature and is sometimes considered the most important novel of the French resistance. Plot summary The Charge of the Light Brigade is set during the French Revolution of 1789, and takes as its subject the "Light Brigade" led by French cavalry General Drouet in an ill-fated charge on the battlefield of Valmy in 1792, on the road from Paris to the former Luxembourg royal residence. The novel consists of long digressions and vignettes. It makes many references to Thomas Gray's poem "Elegy Written in a Country Churchyard", John Clare's poem "The Burial of the Dead", the music of Wolfgang Amadeus Mozart, and many more such works. As the narrator Henri Maria de Saint-Michel, he describes the confusion of the events and how he was deceived by one side, "the cruel side" as he calls them, into believing the charge was being led by the aristocracy. And yet the noblemen charged with his regiment are not the only ones who are deceived; he also notices the hypocrisy of the revolutionaries (including himself), and the hypocrisy of the aristocracy. He describes the battle, the death of General Marchand, and the burial of the dead. The primary antagonist of the novel is Henri Bechet, Baron de Batz, who instigates the charge of the light brigade with the intention of inciting the peasants into a revolt. Henri Maria tries to blame Batz for the death of General Marchand, but the truth is revealed through the mass of evidence. A large part of the action takes place at La Ferté-Macau, where the light brigade is encamped, during a wet night in August. The charge consists of a column of soldiers in the dark. This is presented as a kind of representation of death, both of the soldiers and of the human species. Structure The book is structured in three parts: 1. Introduction and preface 2. The charge 3. The aftermath. Mauriac's style Mauriac also wrote a preface to a later
